

HANDS ON WELDING TRAINING

at your location or NDI Consultants' Training Facility,

NDI works one-on-one with your personnel to provide them the specific skills they need to weld for your company. There is limited disruption to your company's production, saving you time, and money!

- We work with your current or potential welders to enhance their skills.
- When trainee's successfully complete weld test coupons during training, the personnel return to your company as qualified welders, we teach them following your welding procedures.
- Our trainers work to increase your personnel's productivity with a first-time right mindset to help eliminate costly rework!
- When the training is at NDI's facility, the only impact to your company's production is the time of the person in whom you are investing the training.
- Full day and half day flat rates for training are available.
